

CALYPSO

Engineering Support Personnel, Inc. (ESP) has developed an affordable, self-contained desktop flight simulator, utilizing X-Plane 11®. Meet the “**Calypso**”.

Our desktop is an affordable system used for flight procedures, aircraft startup, flight, and shutdown. You can perform landing approaches, holding procedures, G-1000 navigation, fly pre-loaded missions or “Free Fly”.

Our device is designed to be used by anyone. No special training required. Our desktop comes complete with all features offered by X-Plane 11 Professional®.

With **Calypso**, there’s no need to purchase separate components. Everything you need comes with our desktop.

WARRANTY

Price includes a 90-day warranty with an extended limited warranty available as an option.
