

Reconfigurable Aircrew Trainer (ReACT)

ESP has developed an affordable, flight simulator utilizing Lockheed Martin Prepar3D®. Meet the **“ReACT”**. The **ReACT**, modeled after the 737-800, is an affordable system used for flight procedures, aircraft startup, flight, and shutdown. Perform landing approaches, holding procedures, VOR tracking, fly pre-loaded missions or “Free Fly”. The **ReACT** comes complete with all features offered by Prepar3D® such as 24,900 airports, realistic air traffic control, accurate topography and more. The **ReACT** can easily be transported and setup anywhere. As long as standard 15amp outlet power is available, the **ReACT** can be utilized. The **ReACT** utilizes off the shelf hardware. **Please scan the QR code below for more information on the ReACT**
